

2026 International Symposium: The Role of Health Providers in Disasters 災難期間醫療照護者之角色國際研討會

近年來，國家韌性醫療整備計畫已逐步建構以全民與全體醫療體系為核心的災難應變架構，內容涵蓋社區民眾急救能力之訓練、各層級醫療體系的災難醫療應變整備，以及不同類別醫事人員的專業賦能訓練。其中，提升各類醫事人員對災難準備的整體認知，並強化其必要之知識與技能，被視為推動醫療韌性與災難應變能力的關鍵要素。

本次研討會旨在透過與國外專家之交流與經驗分享，探討不同類別醫事人員在災難應變整備中的角色定位、實務經驗與跨專業合作模式，期能拓展我國醫療專業人員對災難醫療之視野，進而促進更多醫事同仁積極投入災難應變整備工作，共同強化整體醫療體系之韌性與應變能力。

In recent years, the National Medical Resilience and Preparedness Program has progressively established a comprehensive disaster response framework that encompasses community-based first aid training, disaster medical preparedness across all levels of the healthcare system, and capacity-building initiatives for diverse categories of healthcare professionals. Among these components, enhancing healthcare workers' awareness, knowledge, and competencies related to disaster preparedness is widely recognized as a critical element in strengthening medical resilience and effective disaster response.

This symposium aims to facilitate knowledge exchange and experience sharing with international experts, focusing on the roles, practical experiences, and inter-professional collaboration of various healthcare professionals in disaster preparedness and response. Through this platform, we seek to broaden perspectives within the healthcare community and encourage greater participation of healthcare professionals in disaster preparedness efforts, thereby contributing to the overall resilience and responsiveness of the healthcare system.
